MOHAMMED JAWAD AL LAWATI

Renewable Energy Engineer | Solar PV · Energy Storage · Green Hydrogen

Muscat, Oman | Omani national | +968 9850 2814 | mohjlaw@gmail.com | linkedin.com/in/mohammed-al-lawati-8a33b3225

PROFESSIONAL SUMMARY

Renewable energy engineer with 3+ years designing and delivering grid-tied solar PV systems at an Omani EPC company. Design and stakeholder-approval focal point on PDO's Project NOOR, 2+ MW of residential rooftop PV installed across the Sultanate. Skilled in PVsyst and HelioScope simulation, techno-economic feasibility and LCOE analysis, commissioning, cost estimation and Python automation. Currently completing an MSc in Hydrogen Technology and Economy as a Shell Nawafidh Scholar. Seeking solar PV, battery energy storage (BESS) and power systems engineering roles across the GCC.

PROFESSIONAL EXPERIENCE

Solar Design Engineer | Hussam Technology Company (HTC), Solar Division, Muscat — Aug 2023 – Present

- Became the focal point for design and stakeholder approvals on Project NOOR, Petroleum Development Oman's (PDO) nationwide programme that delivered 2+ MW of grid-tied rooftop PV to employee homes across Oman.
- Designed grid-tied PV systems for residential, commercial and industrial (C&I) clients in HelioScope, optimising array layout and configuration for energy yield and grid compliance.
- Delivered the full project lifecycle, covering site surveys, technical design, procurement, installation and commissioning, across multiple installation types.
- Developed Python scripts that automatically generate stakeholder approval packages and residential installation quotes, reducing manual documentation work for the team.
- Built pricing models and an internal component-price database that made cost estimation faster and more accurate and kept bids competitive.
- Designed and launched the company website (htc.om) to strengthen the solar division's online presence.

Alternative Energy Intern | OQ Alternative Energy, Clean Energy Department, Muscat — May 2023 – Jul 2023

- Carried out a techno-economic feasibility study for a proposed solar facility using PVsyst energy-yield simulation and levelised cost of energy (LCOE) analysis.
- Reviewed contract and consultant submissions for ongoing clean energy projects.

Solar Engineering Intern | Hussam Technology Company (HTC), Solar Division, Muscat — Nov 2022 – May 2023

- Carried out site surveys, HelioScope PV simulations, commissioning and approvals for Project NOOR residential solar installations.

EDUCATION

MSc Hydrogen Technology and Economy | GUtech, Muscat — Apr 2026 – Present

- Shell Nawafidh Scholar, selected competitively across multiple cohorts.

BEng (Hons) Renewable Energy Engineering | University of Exeter, United Kingdom — Sep 2019 – Jul 2022

- Upper Second-Class Honours (2:1), GPA 3.5. Pro-Vice-Chancellor's Award for Academic Excellence.

TRAINING AND CERTIFICATIONS

- **Shell Nawafidh Programme**, Shell Oman and Outward Bound Oman, Oct 2023 – May 2024. Capstone project simulating a 25 MW utility-scale solar PV plant in Duqm.
- **PV101: Solar Electric Design and Installation (Grid-Direct)**, Solar Energy International (SEI), Dec 2024.
- **HSE Induction (Unified HSE Passport)**, Oman Energy Association.

TECHNICAL SKILLS

- **Solar design and simulation:** PVsyst, HelioScope, SketchUp (3D modelling)
- **Engineering:** grid-tied PV system design, energy yield assessment, techno-economic feasibility, LCOE, cost estimation, site surveys, commissioning, net metering
- **Data and automation:** Python, Microsoft Excel, Word, PowerPoint
- **Languages:** Arabic (native), English (fluent)
